

## Prices and Prospects.

### MARKET FIRM FOLLOWING CHANGE FROM LETHARGY OF RECENT WEEKS

Some Inquiries Develop Into  
Contracts, Others Have  
Been Held Over.

#### GENERAL IMPROVEMENT

And Wage Increase Tend to Push  
Furnace Price to \$3.50; Some Furna-  
ces Go to By-Product Plants for  
Supplies; Foundry Is Improving.

Special to The Weekly Courier.  
PITTSBURGH, Sept. 21.—The coke  
market presents a very firm appear-  
ance after the recent activity, which  
though not great in point of tonnage  
represented quite a change from the  
very lethargic condition that obtain-  
ed for weeks.

There is little inquiry for furnace  
coke in the market at present, some  
business recently under discussion  
having led to contracts while other  
proposals appear to have been drop-  
ped. In particular, two or three mer-  
chant furnaces that were thinking of  
going in recently, when there was a  
little business in buying of pig iron, have  
postponed consideration of the matter  
on account of pig iron having re-  
mained in dullness. They expect a  
revival of activity in pig iron short-  
ly, and the subject will then come up  
fresh.

Coke operators analyze the market  
situation as presenting two factors,  
each of which is about 25 cents. One  
is the wage advance, as substantially  
all the independent operators have  
advanced to the Frick scale of August  
1, which means about 35 cents a ton  
more in the cost of making coke than  
the independent scale of July 1. The  
other factor is the general improve-  
ment in the situation, including heavier consump-  
tion of pig iron at steel works and found-  
ries and stiffening in prices of pig  
iron and some descriptions of finish-  
steel. A month and more ago the  
furnace coke market was at about  
\$3.00. At times the sales were more  
fluctuating at less than \$3.00 than at  
the present time, but the concessions on  
fully standard coke were very small,  
amounting to the question of whether  
cents of 50 cents is added to \$3.00,  
there is no doubt about the first 25  
cents. Some operators insist that  
30 is the proper price and are try-  
ing to get it.

Thus far actual sales do not sup-  
port a \$3.50 price, but they do sup-  
port \$3.25. Whether or not the  
market is at the present moment in  
a position of advancing is a question.  
It is hardly active enough just now to  
be really advancing. Some time ago  
it was advancing, in order to get to  
the present basis. Fourth quarter  
coke has brought as high as \$3.50, but  
it has also gone to \$3.25, and unfor-  
tunately for appearances, the \$3.40  
transaction did not occur after the  
\$3.25 transaction.

Odd lots of spot furnace coke, how-  
ever, have gone at approximately  
\$.50 to the ultimate consumer, brok-  
ers paying operators somewhat over  
\$.25, but a regular furnace coke mat-  
ter would not bring altogether as  
much, although an unconfirmed rumor  
says \$3.50 is the price at which a  
furnace contract was recently closed.

An interesting feature of the situ-  
ation is that a furnace here and there,  
formerly dependent entirely upon  
Connellsville for its supply, has gone  
to street works, having by-product  
plants and a surplus of capacity at  
its disposal. They may have saved a  
few cents by doing this, but their pro-  
spects of supplies in future are quite  
uncertain. There is no steel interest  
at this time, and the coke market  
cannot take care of its full require-  
ments in its own blast furnaces, and  
there is scarcely a single one that  
can save a balance. The average  
steel interest makes less by-product  
than enough to operate its furna-  
ces, and when it has a full operation  
it uses some outside coke. Obviously  
a temporary coke customer will be  
needed the next time there is a  
seasonably full operation for the steel  
industry, and then the Connellsville  
region may have acquired business so  
that it cannot take care of the furnace  
that has left the fold to save a few  
cents a ton for a few months.

Demand for foundry coke has con-  
tinued to improve, not rapidly, but at  
a steady rate. The average operator does  
not care to name a contract price for  
foundry coke at this time, preferring  
to wait from time to time. Prices on  
foundry coke are quite firm and show  
a continuing tendency, beyond the  
recent advance recently recorded.  
The market as a whole is quotable  
very firm at last week's figures:

Spot furnace coke ..... \$3.25, \$3.50  
Contract furnace coke ..... \$3.25, \$3.50  
Spot foundry coke ..... \$3.25, \$3.50  
The pig iron market continues dull  
this week, as it has been since the  
first week of buying activity recently,  
which sent the price of foundry iron  
to \$1.50 a ton. Instead of merchant  
prices being feared that the present  
dullness will produce a recession in  
prices, they feel that another watch  
order is likely to come their way.

## Review of the Connellsville Coke Trade.

### Statistical Summary.

PRODUCTION	WEEK ENDING SEPTEMBER 17, '22				WEEK ENDING SEPTEMBER 10, 1922			
DISTRICT	Ovens	In	Out	Tons	Ovens	In	Out	Tons
Connellsville	15,697	757	17,910	7,930	18,407	757	17,910	8,410

### CONFERENCE ON UNEMPLOYMENT TO BE HELD MODAY

Heads of Great Industries,  
Labor Leaders and Others  
to Meet.

#### REAL WORKING PROGRAM

WASHINGTON, Sept. 21.—The na-  
tional unemployment conference will  
meet here Monday at 10 o'clock.  
Secretary Hoover announced today.

The conference, Secretary Hoover  
said, will consist of persons selected  
as those who would be the most help-  
ful in solving the nation's unemploy-  
ment problem and at the same time  
representing geographically the various  
sections of the country.

The conference on meeting Monday  
will organize itself, Mr. Hoover said,  
and then probably dissolve into com-  
mittees to handle the various matters  
to be considered. Sessions of the full  
conference will be public, he said,  
adding it is probable that hearings  
may be held by the various commit-  
tees.

The economic advisory committee  
of the commerce department, the sec-  
retary continued, has completed a  
working program for the guidance of  
the conference in approaching the un-  
employment question and a vast  
amount of material and statistical  
data has been prepared for the use of  
the conference.

Mr. Hoover did not indicate the na-  
ture of the conference's program be-  
yond saying that an unemployment  
policy is contemplated which does not  
provide for any system of doles or  
charitable measures, but would be a  
practical working program.

The conference will be participated  
in by the heads of the great indus-  
tries in all parts of the country, labor  
leaders, students of economics and  
others. Among those selected to rep-  
resent the industries are W. K. Field,  
president of the Pittsburgh Coal com-  
pany, and Charles M. Schwab, presi-  
dent of the Bethlehem Steel Corpora-  
tion. Samuel Gompers, president of  
the American Federation of Labor;  
W. S. Carter, president of the Brother-  
hood of Locomotive Firemen and En-  
gineers, and John L. Lewis, president  
of the United Mine Workers of Amer-  
ica, will represent organized labor.

#### SUPPLEMENT FILED

To Defense of J. F. Thompson in Suit  
of Rodney Sackett.

Supplemental affidavit of defense by  
Joshua F. Thompson, the former En-  
glishman banker, who is named de-  
fendant in a suit filed by Rodney  
Sackett of Virginia, was ordered  
filed by Judge Charles P. Orr in United  
States district court in Pittsburgh.  
The suit was filed July 8, 1918, by  
Sackett, who claimed \$12,500 as a fee  
or commission for securing a party  
willing to make a loan of \$750,000 to  
Thompson. Sackett in his suit alleges  
that Thompson was unable to give  
security and that his financial con-  
dition and business standing was not  
as represented, with the result that  
the loan was not made.

#### WILL NAME SUBSTITUTE

John L. Lewis Unable to Attend  
Unemployment Conference.

INDIANAPOLIS, Sept. 20.—John L.  
Lewis, president of the United Mine  
Workers of America, passed a delegate  
to attend the unemployment conference  
in Washington next week, announced  
today he would accept the appoint-  
ment but it would probably be neces-  
sary for him to name a substitute to  
represent the miners.  
The biennial convention of the min-  
ers' union opened here this morning  
and probably will be in session two or  
three weeks. Talk around the con-  
vention hall was that Philip Murray,  
vice-president of the organization,  
probably would be sent in Mr. Lewis'  
place.

B. & O. Force Cut.

GRAFTON, W. Va., Sept. 21.—Notices  
announcing a 12 per cent cut in the  
working force of the engine and car  
repair shops of the Baltimore & Ohio  
railroad here were posted today. Ap-  
proximately 70 men will be fur-

### FRICK HELD RESIDENT OF PENNSYLVANIA

NEW YORK, Sept. 21.—Sergeant  
Foley ruled today that Henry Clay  
Frick, steel magnate, who died at his  
home here December 1, 1919, was a  
resident of Pennsylvania.  
This ruling affects the contention  
of the state comptroller's office that  
Frick died in New York and that his  
property was subjected to a state  
transfer tax.

### Slight Gain in Number of Cars Hauling Freight

Cars loaded with revenue freight  
during the week ending September 17  
increased 392 compared with the fig-  
ures of the week previous. According  
to the report of the American Rail-  
way association, the total being 530-  
601 cars. This is the largest week's  
loadings since December 11, 1920, and  
represents the fourth consecutive  
week in which an increase is shown.  
Compared with the corresponding  
week of 1920, however, the loss is  
131,023 cars.

Coal loadings were 155,818 cars, a  
decrease of 5,796 from the week be-  
fore and 49,090 less than for the same  
week of 1920. Loadings of coke aggre-  
gated 4,658 cars, an increase of 48 over the  
week previous. Ore loadings increased  
1,977 cars over the week previous, be-  
ing 31,212 cars.  
The total number of cars loaded  
with merchandise and miscellaneous  
freight for the week was 505,435, an  
increase of 6,067 as compared with  
the week ending August 27 but 30,000  
under the corresponding week of 1920.  
The grand total for the year to date is  
25,760,153 as compared with 29,973,881  
for the corresponding period of last  
year.

### Ira Cochran Head Of Coal Operators' Traffic Bureau

Ira Cochran, a former well known  
Connellsville resident, has been made  
head of the traffic bureau of the  
American Consolidated Coal Operators'  
association, with headquarters in  
Washington, D. C., and has already  
taken charge of his new work. His  
mother, Mrs. Anna Cochran, will  
leave later for Washington to make  
her home.

Mr. Cochran was in the employ of  
the Pennsylvania Railroad company  
for several years, but of late had  
been connected with the Western-Dod-  
son Coal company, with headquarters  
in Pittsburgh.

#### COKE PRODUCTION

In Connellsville and Lower Connell-  
ville Districts Compared With 1920.  
The estimated production of coke in  
net tons in the Connellsville and Lower  
Connellsville districts, by weeks,  
with the total compared with the cor-  
responding week of 1920, is shown in  
the following:

Week	Merch.	Furn.	Total	1920
Jan. 1	1,123	11,113	12,236	12,236
Jan. 8	1,123	11,113	12,236	12,236

## PERMANENT EXPORT MARKET FOR COAL IS AN URGENT NEED

As Means of Stabilizing the Industry and Insuring Steady Operation.

### U. S. IS NOW A FACTOR

In the Foreign Markets With Possibilities Through Development of Cooperation Between Organizations Now Selling Coal Overseas Users.

The question of the establishment of a permanent export market for American coal is one of great significance to the coal industry.

The present productive capacity of coal mines in the United States is over 700,000,000 tons annually. The annual consumption of coal in this country is approximately 500,000,000 tons annually. Obviously, there is, therefore, a very large potential over-production of coal in the United States.

This potential over-production is one of the basic causes which has created instability in the coal industry. This instability has in turn been a cause of price fluctuations, coal shortages and frequently for labor troubles. If the consumer is to secure a low price for coal, it is evident that there must be an opportunity for the coal operator to carry on continuous mining production, resulting in lower costs and greater efficiency in output. Unless, therefore, it is possible to develop additional outlet for American coal overseas, the coal industry must either continue to confront potential over-production or a number of mine operations must be eliminated.

Prior to the war the American coal operator was not a serious factor in the foreign market. During the war, however, the coal industry was able to develop a large movement of coal to Central and South America and to the Mediterranean district in Europe. At the present time the question of continuing this export market in the face of competition from English and other European countries.

At the 24th annual convention of the American Mining Congress, the possibilities for the development of permanent export markets for American coal will be one of the features of the convention program. Charles A. Owen, president of the Imperial Coal Corporation of Johnston, Pa., and of the Tidewater Exchange Inc., New York City, has during the past four months been making a special study of the European market for American coal, and has made an exhaustive analysis of the entire question of competitive costs and the distribution of American coal abroad. He will present one of the papers at the convention indicating the opportunity and the possibilities which are presented in the development of the export of American coal.

The most important field, however, for the sale of American coal abroad lies in Central and South America, where American coal of the better qualities competes on an effective basis with European and English competitors. Doctor Henry Mac Payne, who has made a special study of export possibilities and who is particularly interested in the development of cooperative methods for the sale of American coal overseas, will present a paper at this convention furnishing the results of his investigations of the Central and South American markets.

In 1920 the exports of American coal ranked third in value among all of the commodities exported from the United States. The total value of coal exports was approximately \$255,000,000. If coal was drawn from all of the important coal mining districts lying in the Appalachian regions and its importance to the Illinois and Indiana operator is indicated by the fact that the withdrawal of this coal from the domestic market furnishes a large competitive field and a greater opportunity for absorption of the production in the middle western and central coal fields.

The basic factors in connection with the problems of American export lies in the question of cooperative effort in the sale of American coal abroad. Several such organizations have been created and in the papers at the convention special emphasis will be laid upon the possibilities of creating and developing cooperative organizations in which a number of different coal districts will be represented in the continued sale and increased export of American coal in the overseas market.

### Gas Masks to Protect Against Dust Proposed

WASHINGTON, Sept. 21.—Gas masks of modified design may be introduced in certain industries as a result of investigations to be undertaken at the Pittsburgh mine experiment station, the Bureau of Mines announced.

"An investigation of the various types of respirators used by workers in numerous industries in preventing the inhalation of injurious dusts is to be undertaken at the Pittsburgh experiment station," the announcement said. "Stone dust and metal dusts breathed by miners have been the cause of much pulmonary disease, incapacitating many workers and at times resulting in early death. Respirators are often serviceable. In the proposed test of respirators, fine particles such as can pose tobacco smoke and fine mineral dusts suspended in air will be filtered with the different materials. The relative effectiveness of the filters will be noted as well as their resistance to passage of air and tendency to clog."

## MINES AT DUNBAR CLOSED BY STRIKE FOR FRICK SCALE

Hundred Fifty Affected by Walkout; Men Notified to Remove Tools From Workings.

The mines of the American Manufacturing Company at Dunbar, which supply coal for the by-product plant of the Smet-Solway company and for other purposes, at the turnkey, are closed by a strike of the men, who demand that the Frick wage scale be restored. About 150 men are affected.

The men, it was said, have been working for two months under an agreement by which employees at the furnace and affiliated plants accepted a cut in wages. The miners were notified Saturday to remove their tools from the mines but have ignored the order, it was said.

In defense it is said the company has informed the men it cannot operate at the Frick scale and will close the mines rather than pay it. It is understood that the strike is a protest against the company's refusal to consider the mines' claim for a wage increase should the mines remain in suspension.

### Vast Quantities Of Coal Removed From River Bed

SUNBURY, Pa., Sept. 21.—River coal operations along the Susquehanna river from Berwick down to Harrisburg this year have resulted in the production of thousands of tons of anthracite coal. While accurate figures on the year's operations have not been compiled it is estimated the receipts will nearly or quite equal those of any previous year.

The coal is taken from the bed of the river by means of dredges of various types. The accumulation in the stream is the result of years of operations at mines and the dumping of waste and culm into the river by collieries at various points. One industry here has been recovering approximately 100 tons daily while others at other points have been recovering about as large a quantity.

### Miner's Claim for Compensation Is Refused By Board

HARRISBURG, Sept. 21.—In an opinion in which effects of breathing gas or other emanations of burning coal were discussed at length, the state compensation board has upheld the decision of Referee, Champion of Williamsport in refusing compensation to John Foulk, an employee of the Treverton Colliery company, Northumberland county. The case attracted considerable attention and a second hearing was held.

Foulk was helping to put out a fire on a culm bank and the fumes made him sick but the board finds, after exhaustive inquiry and much discussion of effects of coal gas poisoning, that it did not cause the mental disturbance claimed. The decision probably will be a precedent as certain facts relative to effects of such gas on the human system are admitted.

### Radical Departures In Mammoth Tipple At Kentucky Mine

The mammoth tipple of the United States Coal & Coke company at Lynch, Harlan county, Ky., for some time has attracted the attention of engineers and operators of the entire industry, primarily because of its extremely large capacity and also because of some radical departures from the accepted methods of operation.

The tipple is capable of dumping 16,000 tons of coal in eight hours and is equipped with a 5,000-ton storage bin, through which the entire output is handled, in loading the railroad cars. This operation is located in the eastern end of Harlan county on Looney creek, a branch of Poor Fork of the Cumberland river and about 25 miles east of the town of Harlan and is served by the L. & N. R. R.

### LESS UNEMPLOYED

More Persons Idle in 1914 Than Now, Labor Secretary Says. WASHINGTON, Sept. 21.—Those who are disturbed over the 6,725,000 unemployed of today overlook that in 1914 there were 7,000,000 persons out of work, a larger percentage of whom were men and actual bread winners than in the present unemployment, Secretary Davis said today in a statement.

Declaring that the country had just passed through a period when every effort was made to induce women and others who had not worked for pay before to "work and save" during Europe, Mr. Davis said present unemployment figures include great numbers of persons upon whose earnings no one actually is dependent.

### FULL CREW COMPLAINTS To Be Settled by Joint Committee of Employers and Employees.

HARRISBURG, Sept. 21.—Representatives of railroads, headed by George Leboutellier, general superintendent of the Pennsylvania, and of the railroad brotherhoods, headed by George B. Rowland of the legislative committee, have reached an agreement regarding complaints on manning of trains whereby disputes will be adjusted by brotherhoods and local committees and taken to the Public Service Commission only as a last resort. All complaints before the Public Service Commission affecting full crew matters will be held in abeyance until a further meeting in October between representatives of both bodies.

### Standard Connellsville Coke

MONTHLY CAPACITY 52,000 TONS. P. R. R., P. & L. E. R. R. and B. & O. R. R. Connections

Coke low in Sulphur and Phosphorus and of strong physical structure. Our Coke at HERBERT WORKS is made in LONGITUDINAL OVENS and is entirely mechanically handled, thus eliminating by screening all dust and dirt.

ANALYSIS FURNISHES ON REQUEST

SCOTTVILLE, Sept. 1.—The case of the unknown woman found dead in a ditch and taken to her residence on the Jess. & N. W. R. R. farm, two miles west of this village, is still being investigated by the coroner. The flames had taken hold of the body when they were extinguished by the firemen. It was immediately taken to the coroner's office, but it was impossible to save anything. The inmates of the workhouse were taken to the Scottville reformatory and the Scottville reformatory were taken to the Scottville reformatory. The house contained eight rooms. Only the walls remain.

## 115 NAMES ON TABLET

Moving to Philadelphia, GREENSBURG, Sept. 13.—Squire and Mrs. J. Q. Truxal and family will move to Philadelphia in a few days to make their permanent home. Last spring Squire Truxal was appointed to a prominent position in the Reformed church and his duties as financial secretary of the church require that he should be at the general headquarters in the Quaker City.

**T. S. Gales Dead.**  
T. S. Gales, formerly of Masontown, died at his home in Spears, Kan., according to word received Tuesday. He had been ill for some time.

The regulations apply to the following western counties: Allegheny county is closed to the hunting of deer, turkeys, grouse, pheasants and quail until 1922. Bedford county is closed for pheasants; Somerset, pheasants and quail; Washington for pheasants, and Westmoreland for pheasants and quail until the 1923 season begins.

## Felty Fogle, Mount Pleasant Huckster, Robbed of \$3,900

Money Saved by Aged Man  
Kept in Trunk in Store in  
Which He Lived.

### HAD NO FAITH IN BANKS

MOUNT PLEASANT, Sept. 14.—Felty Fogle, veteran huckster and keeper of a small store in a basement in Main street, which was also his place of abode, does not believe in banks. Therefore, known only to himself, he thought, he kept his savings in a trunk in the store. During many years he had accumulated a small fortune—\$3,900.

Last Thursday Felty took out a small sum before making a visit to Pittsburgh. He did not look into the trunk again until yesterday. The money was gone. There lay only the bags in which he had kept it. The trunk had been taken again.

Time after time following his return from Pittsburgh Felty had passed the trunk, which stood in a corner of his one-room establishment. It was locked as usual. He noted, and it did not occur to him that it had been tampered with and his savings were gone.

When the theft was perpetrated Felty does not know. If it was during his absence in Pittsburgh, the thief must have had a key to his door for it was locked when he returned. The belief is the money may have been removed while he was out of the place for a brief time during business hours. Felty is nearly 75 years old and the blow is therefore the heavier. The police have been notified but they had no clues.

### INVESTIGATION

#### UNDER WAY OVER

#### WEST SIDE FIRE

Owner of Building Being Searched  
That Gas Lamp Might Have  
Been Cause.

Fire Chief W. E. DeBolt is conducting an investigation into the cause of the fire which destroyed the stock in the store of M. Cohen on the West Side Tuesday evening. The origin of the blaze is still a mystery.

T. S. Reil of Uniontown, owner of the little building which housed the store, declares the report that the blaze started from gas lights being turned too high is not correct as there is no gas line into the storehouse. He also declared there were no electric wires near where the flames broke out.

The fire was discovered by a boy playing in the street nearby. He notified the firemen, located less than a block away. The flames had made such headway, however, that the big house had to be used.

Chief DeBolt last night questioned a girl who had clerked in the store but her testimony revealed no new light on the cause of the fire. He has not yet completed the inquiry, however.

The statement of Mr. Reil follows: "The fire Tuesday evening in Morris Cohen's clothing store at 802 West Crawford avenue, was not caused by gas, there being no gas in the building, nor were there any electric wires near where the fire started. The fire was discovered about 10 minutes after store was closed."

### FALL FROM ENGINE

#### FATAL TO JACKSON

#### PRINKEY, REPAIRMAN

Was Veteran of Company D, 110th  
Infantry and Had Served With  
the Command Overseas.

Losing his balance and falling from a Baltimore & Ohio railroad engine in the yards of that company here, Jackson Prinkey, 56 years old, was fatally injured Thursday afternoon about 5 o'clock. He was taken to the Cottage State hospital, where he died at 9:15 o'clock. One leg was broken in the fall.

He was an electrician and specialized in headlight work. He was engaged at this when the fatal accident occurred.

The deceased was a member of Company D, 110th Infantry, serving overseas in the World War. He was also a member of the United Brethren church and of the Maccabees. He is survived by his mother, Mrs. Mary Ann Prinkey, and the following brothers and sisters: Henry and George, at home; Mrs. Hannah Affis, Connelville; Mrs. Laura Frank, McKeesport; Mrs. Alverda Green, Bracken; Lloyd Prinkey, Connelville. His father, E. S. Prinkey, died in March, 1918, while his son was still in France.

The body was prepared for burial at the funeral parlors of J. E. Sims.

### LOCAL MAN'S BROTHER

Made Advisor of Freshmen at University of Pittsburgh.

E. F. Ashe, brother of Stanley P. Ashe, former city superintendent of schools, has been appointed associate professor in the school of economics, University of Pittsburgh, in which capacity he will serve as advisor to members of the freshman class.

Mr. Ashe is well known in Connelville, having taught in the South Connelville schools in 1906-07. He attended Mount Union college 1901-05 and graduated from the University of Pittsburgh in 1912. Following his graduation he spent some time as school superintendent in Pennsylvania and California and later was in charge of playground and park work in Pittsburgh. He was most recently engaged in employment manager and director of education and social work for the American Zinc & Chemical company at Langford, Pa.

## "GUS" STICKEL IS HOST AT MOST ELABORATE FEAST

erous Diversions Are Provided.

Several days ago invitations to a "sight-seeing tour" were received by a number of Connelville, Scottsdale and Uniontown business and professional men over the signature of A. C. Stickel. "There will be a special train leave the Baltimore & Ohio depot at 3:05 P. M., September 15, on a 'sight-seeing tour' the invitations read. "Train will return at 11:50 P. M. Leave your pajamas at home, but bring your toothpicks."

"There was no inkling as to where the 'tour' was to be, nor was any other information forthcoming from 'Gus.' 'Be at the train and see,' was all that could be gotten from him.

Fifty-odd persons were at the station at the appointed time. Jake Dull's "Cannon Ball Express" from the Indian Creek Valley railroad was awaiting them.

Mr. Stickel was not on the train, but when the party had been piloted to his summer home a half mile from the terminus of the Mill Run branch of the Valley railroad the genial host was there to welcome them.

To make the story short, the finest fried spring chicken dinner this bunch of fellows can recall was served soon after their arrival, in the park in the rear of the home.

The occasion was an entirely informal one and Mr. Stickel and his assistants saw to it that nothing in the line of entertainment that could be provided was lacking.

Incidentally the feast marked the formal opening of the Stickel summer home, in that it was the initial function of the kind; the first served in the park, on which the owner has expended considerable time and money, the improvements including a concrete swimming pool and a tennis court, also an eating pavilion and kitchen equipment. A portable electric lighting outfit was installed for the occasion, the wires being permanently strung to trees in the grove.

For the dinner a table 70 feet long had been constructed. Just for the novelty of the thing a telephone line connected the head, which sat the host, to the foot, graced by the presence of W. D. McGinnis.

Often, said Eugene T. Norton, in a brief after-dinner speech proposing a vote of thanks to the host, has this same "bunch" been entertained, at Ligonier, at Addison and other places, but this was the first to which the feast was prepared and served by the "home folks"—those of Mr. Stickel's family. And the vote was given, with ruddy cheer accompanying it. Also there was one for James J. Dougherty, general manager of the Valley road, in providing the train.

Diversions of the afternoon and evening were croquet, baseball, horseshoe pitching and cards—and straw hat smashing.

Charles H. Baisley took motion pictures, including antics by Frank R. Graham and Ralph K. Long in the swimming pool.

Host Stickel "pulled one over" during the meal when he called a hush to permit the diners to hear a screech owl in a tree nearby and then called to the owl to come forth, Miss Bessie Dahl of Mill Run responding. "So perfect was her reproduction of the notes of the owl that all were deceived."

"On the dot" the special train left for home, the members of the party arriving here soon after 11:30 o'clock.

Regrets were sent by a number who were unavoidably detained. Those who shared the hospitality of Mr. Stickel were E. T. Norton, E. C. Higgins, W. D. McGinnis, E. R. Flou, George S. Connel, C. M. Stone, A. B. Norton, C. L. Wolf, R. K. Long, James J. Dougherty, William Sellers, William F. Brickman, Charles Stickel, W. J. McGinnis, Dr. J. L. Cochran, Ross S. Matthews, Alex. R. Hood, W. L. Wright, Frank R. Graham, A. N. DeMuth, S. N. Osborne, Otto Stickel, Milton Stickel, W. E. Wiggin, C. B. Franks, J. Melvin Grey, W. S. Stimmler, Robert Norris, M. B. Pryce, K. Kramer, S. P. Ashe, S. R. Goldsmith, F. E. Markell, H. George May, J. R. Davidson, W. O. Schoonover, Joseph J. Thompson, J. Donald Porter, J. L. Evans, Dr. T. B. Eckard, Herbert C. Pringle, Dr. R. S. McKee, Dr. L. P. McCormick, Samuel J. Fred, Kurtz and Charles H. Baisley, all of Connelville; Bruce F. Sterling, Homer Birchard and E. Sturges Shewalter, Uniontown; Walter F. Stauffer and Thomas W. Dawson, Scottsdale; and Dr. D. Allison Walker, Hecla.

Others attending the affair included Mrs. Catherine Stickel, mother of the host, Mrs. D. Allison Walker, Hunter Newell, Frank Dahl, Mrs. George Arzbacher, Miss Anna Arzbacher, Miss Anna Arzbacher and Miss Ida Stickel.

Attending Lebanon College.

Edgar Francis, better known as "Pep," is attending the Lebanon Valley college, this being his first year. He has reported for the freshmen football team. He was captain of the high school basketball team last season.

Hackett, pastor of the Presbyterian church, delivered the appropriate eulogy.

PATRICK HUMES

Patrick Humes, well known resident of Fayette City, died yesterday. He was struck by an automobile Friday afternoon at 3 o'clock; he was walking along the Navvies road toward his home. Deceased was known in mine working circles.

THOMAS PINKNEY

Thomas Pinkney, 37 years old, died Sunday morning at the home of his father, Robert Pinkney, near the Summit. Those surviving besides his father are Robert, John, Peter, David, Frederick and Joseph, brothers, and Mrs. William Dennis and Mrs. Levi Morris, sisters.

GEORGE A. HAHN

George A. Hahn, 77 years old, died at the home of his daughter, Mrs. J. H. Mills, Cottage avenue, Wednesday morning. The deceased had been down street during the early part of the morning and seemed in the best of health. While returning home he fell in some unknown manner, and it is thought that the shock of his fall caused the stroke of paralysis, which proved fatal. The deceased was born in Germany, March 22, 1844, and lived a number of years in Connelville, spending most of his life on the West Side. Mr. Hahn is survived by the following children: Albert, Pittsburgh;

WM. G. BRIGHTWELL

Private William G. Brightwell of Company C, 105th Engineers, was laid to rest in Mount Auburn cemetery, Fayette City, yesterday. Funeral services were held under the auspices of Brightwell-Daugherty Post No. 484, The American Legion, Rev. Dr. G. S.
